

CS201 Midterm 1 Part A

31 October 2024

Emre SEFER, Olcay Taner YILDIZ

I. QUESTION (ALGORITHM ANALYSIS) (20 POINTS)

```

1 int algorithm1(int N){
2     int i , j , k, sum = 0;
3     for ( i = 1; i <= N; i++)
4         for ( j = i ; j <= N; j++)
5             for (k = 1; k <= j - i; k++)
6                 sum++;
7     return sum;
8 }
```

What does the function algorithm1 return in terms of N?

II. QUESTION (ALGORITHM ANALYSIS) (20 POINTS)

```

1 int algorithm2(int N){
2     if (N == 0)
3         return 0;
4     int sum = 0;
5     for (int i = 0; i < N; i++)
6         for (int j = 0; j < N; j++)
7             sum++;
8     for (int i = N; i > 0; i--)
9         for (int j = 0; j < N; j++)
10            for (int k = 0; k < N; k++)
11                sum++;
12    for (int i = 0; i < 4; i++)
13        for (int j = 0; j < 2; j++)
14            sum += algorithm2(N / 2);
15    return sum;
16 }
```

What is the time complexity of algorithm2? You must construct the recurrence equation and solve it without using the master theorem.
